

MEVISTO

A PART OF ME FOR YOU

Pearl
with soul.

Memories are everlasting.

To create unique and tangible memories,
that has always been our goal at MEVISTO.

The "pearl with a soul" makes it possible on the basis of a do-it-yourself
Procedure to always have your loved ones with you.
A major advantage over most other pieces of jewelry
of this type is that the personalization is carried out directly on site
and therefore no hair or ash can be sent out
must.

With the product "Pearl with soul", we have succeeded in setting new
standards on the subject of "personalization of jewelry".

The "pearl with a soul" can be made into one of the world's most beautiful
pearls with just a 2-3 cm strand of hair or less than the tip of a knife
most personal mementos.

A special chemical process transforms the ash or hair
into a liquid enriched with the elements, which is
Is absorbed by the pearl and thus absorbed forever.

DO IT YOURSELF

Very simple homemade!

CUT IT

Cut a **2 cm small strand** or pick up a **tiny bit of ash** with the measuring scoop!

FILL IT

Fill the hair or the ashes in the mini-lab.

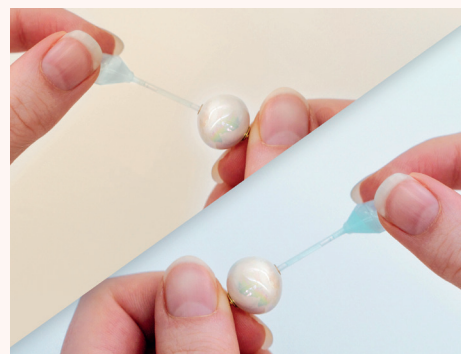

TWIST IT

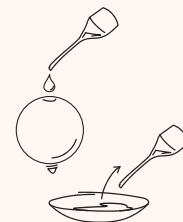

Turn the lid according to the instructions, so that you hear a cracking sound. Remove the battery tab and wait until the mini-lab has warmed up.

DROP IT

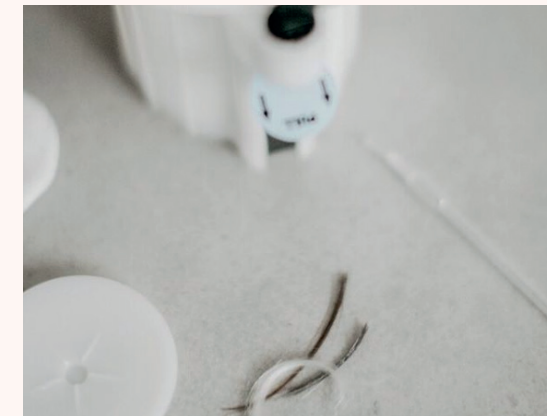

Personalize your piece of jewelry by dripping the liquid obtained from the mini-lab into the small opening of the pearl using the pipette.

REVIEWS

Our customers

I have given my mother a pearl with a soul as a Christmas present. She put a strand of hair from each of us 3 children in the mini lab. She no longer takes this pearl down, because she always has us with her.

Silke H.

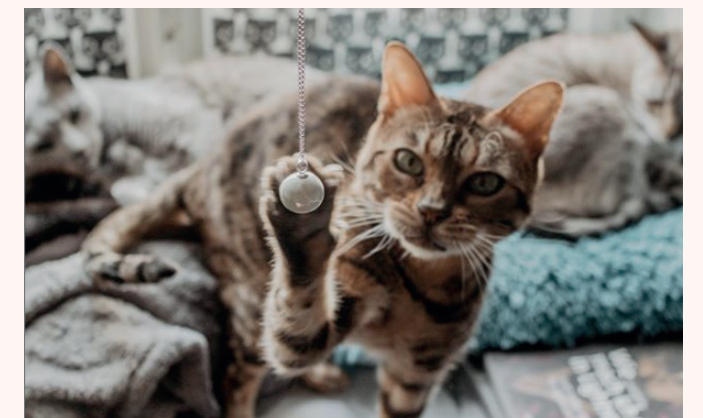

Making the piece of jewelry was a unique experience, and we especially enjoyed cutting off the hair.

Michaela B.

When my father passed away, my two sisters and I each made a pearl of him. It's just nice to have him with you and to think of him like that.

Mary M.

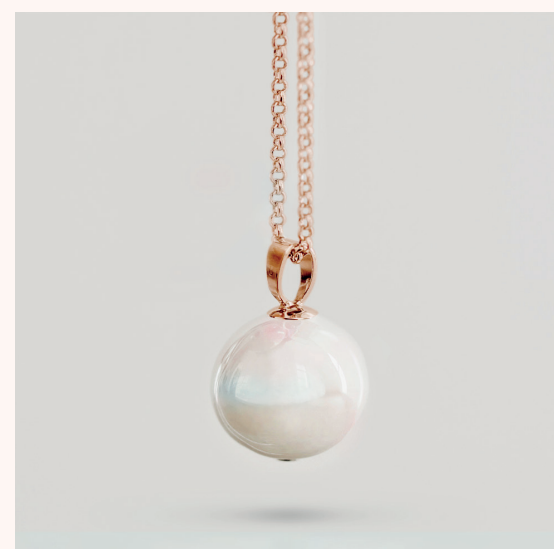

I bought the pearl for myself because my cat unfortunately passed away. I have kept his hair at home until now, it is very emotional for me to wear the pearl!

Katja G.

FREQUENTLY ASKED QUESTIONS

FAQs

Is the personalized liquid dangerous?

No, the liquid is neutralized and harmless after personalization.

Can I mix hair from several people?

Yes, you can of course also mix hair from several people and animals.

What happens to the liquid inside the Ceramics pearl?

The pearl absorbs your liquefied elements like a sponge.

Why can I now dissolve hair and ash in the mini-lab?

Thanks to a further development of our mini-lab, it is now possible to safely dissolve hair and ash and turn them into a personalized liquid. Hair and ash can also be placed in the lab together. Our tip: first the hair, then the ash.

What material are the chains made of?

The chains are made from a high-quality silver alloy without nickel.

What should I look out for in my piece of jewelry?

The jewelry should be removed during personal hygiene (bathing, showering) and mechanical stress should be avoided.

How do I personalize the pearl correctly?

Simply follow the steps in the instructions or the explanatory video that is sent with it and personalization becomes child's play.

Does the pearl need to be closed after the process?

The personalized liquid is immediately absorbed by the open-pored ceramic inside the pearl. The liquid dries out after a short time, but the elements it contains remain in the ceramic.
